**Ref.** **Output**

ASSESSMENT OF OPENING  
ADJACENT TO PATIO DOORS  
AS SHOWN

**CONTENTS**

- 01 PURPOSE AND PHILOSOPHY
- 02 REQUIREMENTS
- 03 CHECK 1 – DIAGRAM 12
- 04 CHECK 2 - DIAGRAM 14

**SUMMARY RESULTS**

UNSATISFACTORY MASONRY TO LEFT HAND SIDE OF PATIO DOORS FOR DEEMED TO SATISFY APPROACH TO BE USED.

**REQUIREMENT**

**CHECK 1**

**Diagram 12 Openings in a buttressing wall**

See para 2C26

**Notes**

- 1** The buttressing wall should be bonded or securely tied to the supported wall and at the other end to a buttressing wall, pier or chimney.
- 2** Openings or recesses in the buttressing wall should be as shown – the

- position and shape of the openings should not impair the lateral support to be given by the buttressing wall.
- 3** Refer to Diagram 8 for the rules for measuring the height of the supported wall.

FOR THE PURPOSES OF BUTTRESSING A 170X170 HOLE WILL BE ACCEPTABLE

**REQUIREMENT**  
**CHECK 2**

**Diagram 14 Sizes of openings and recesses**

**Notes**

Requirements (refer to Table 8 for values of Factor X).

- 1  $W_1 + W_2 + W_3$  should not exceed  $\frac{2L}{3}$
- 2  $W_1$ ,  $W_2$  or  $W_3$  should not exceed 3m
- 3  $P_1$  should be greater than or equal to  $\frac{W_1}{X}$
- 4  $P_2$  should be greater than or equal to  $\frac{W_1 + W_2}{X}$

- 5  $P_3$  should be greater than or equal to  $\frac{W_2 + W_3}{X}$
- 6  $P_4$  should be greater than or equal to  $\frac{W_3}{X}$
- 7  $P_5$  should be greater than or equal to  $\frac{W_4}{X}$  but should not be less than 665mm.
- 8 Take the value of the Factor X from Table 8, or it can be given the value 6, provided the declared compressive strength of the bricks or blocks (in the case of a cavity wall – in the loaded leaf) is not less than 7.3N/mm<sup>2</sup>.

**Table 8 Value of Factor 'X' (see Diagram 14)**

Nature of roof span	Maximum roof span (m)	Minimum thickness of wall inner (mm)	Span of floor is parallel to wall	Span of timber floor into wall		Span of concrete floor into wall	
				max 4.5m	max 6.0m	max 4.5m	max 6.0m
<b>Value of Factor 'X'</b>							
Roof spans parallel to wall	Not applicable	100	6	6	6	6	6
		90	6	6	6	6	5
Timber roof spans into wall	9	100	6	6	5	4	3
		90	6	4	4	3	3

BREAKFAST / CLOAK WALL ADVISED AS MASONRY, THEREFORE WALL LENGTH FOR CONSIDERATION L = 2800 FACE TO FACE, THEREFORE 3050 CENTRE / CENTRE  
 P5 = 620mm , OPENING WIDTH W4 = 1710mm , H=2260EXT AND INTERNAL FLOOR TO CEILING 2070mm

REF PAGE 02 AND CLAUSE 7 DIAGRAM 14 ABOVE AS 620mm < 665mm – THE WALL CANNOT BE DEEMED TO SATISFY EVEN BEFORE THE INTRODUCTION OF A HOLE IS CONSIDERED
